# OMNI

SLOT READER FOR BARCODE AND MAGSTRIPES

The Omni reads up to 3 tracks of information with a single swipe in either direction. In combination, the same Omni unit can read both barcode and MagStripe media. It scans barcodes printed on paper, card stock, or plastic. An infrared option is available for security-based applications, where barcodes are over-printed to prevent duplication. The Omni reader is designed for demanding applications, such as for access control or in self-service kiosks. Weatherproof, sealed, or extended temperature versions are available for use in harsh environments.
